PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 3+ years of experience designing, deploying, and managing scalable, highly available infrastructure on AWS, GCP and Azure. Proven expertise in Infrastructure as Code (Terraform, CloudFormation), container orchestration (Docker, Kubernetes), CI/CD pipeline automation (GitHub Actions, Jenkins), and full-stack observability (CloudWatch, ELK Stack, Prometheus). Hands-on experience with EKS cluster management, Kubernetes manifests, HPA, Ingress controllers, and security tooling (SonarQube, Trivy, IAM). Demonstrated success reducing operational costs by 30% and maintaining 99.9% uptime through SRE-aligned automation, proactive monitoring, and incident response practices.

AREAS OF EXPERTISE

Cloud Platforms: AWS (EC2, RDS, S3, Lambda, EKS, ECS, CloudWatch, CloudTrail, SNS, CloudFront, Route 53, ALB)

IaC & Automation: Terraform • AWS CloudFormation • Ansible • Shell Scripting • Bash

Containers & Orchestration: Docker • Kubernetes • EKS • Helm • HPA • Ingress Controllers • Docker Compose

CI/CD & DevSecOps: GitHub Actions • Jenkins • GitLab CI • SonarQube • Trivy • ECR

Observability & Monitoring: CloudWatch • ELK Stack (Elasticsearch, Logstash, Kibana) • Prometheus • Grafana

Databases & Storage: MySQL • MongoDB • AWS RDS • S3 Intelligent Tiering • S3 Lifecycle Policies

Other Tools: JIRA • Confluence • Git • Linux/Ubuntu • Nginx • PM2 • Certbot SSL

PROFESSIONAL EXPERIENCE

WNS Global Services Pvt Ltd

Senior Associate

Dec 2024 – Jan 2026

New Delhi, India

- Architected and deployed secure, scalable AWS infrastructure using Terraform and CloudFormation for microservices environments, reducing provisioning time by 45% and enabling rapid multi-environment deployments across dev, staging, and production.
- Designed and managed Kubernetes deployments with HPA, rolling updates, and Ingress controllers, ensuring zero downtime releases and high availability across multiple availability zones.
- Implemented comprehensive IAM policies, VPC networking, security groups, and network ACLs for multi-tier microservices, enforcing least-privilege access and compliance with security best practices.
- Designed CloudWatch dashboards for full-stack performance monitoring with automated SNS alerting, maintaining 99.9% uptime and supporting proactive incident management aligned with SRE principles.

Ameya Services

Cloud Engineer

Mar 2024 – Dec 2024

New Delhi, India

- Deployed multi-environment cloud solutions using CloudFormation and Terraform with container orchestration support, eliminating configuration drift and enabling consistent, repeatable deployments across 3+ environments.
- Managed EKS clusters and Kubernetes manifests for Deployments, Services, and Ingress Controllers; implemented cluster auto-scaling and ALB Ingress to handle traffic spikes without service disruption.
- Integrated CloudTrail and ELK Stack for centralized logging, auditing, and compliance monitoring across distributed microservices, improving security posture and reducing MTTR by 35%.
- Built and maintained CI/CD pipelines using GitHub Actions and Jenkins for Docker container deployments, automating build, test, and deployment cycles to accelerate software delivery.

Daksh Concentrix Pvt Ltd

Cloud Support Engineer

Mar 2022 – Dec 2023

New Delhi, India

- Provided technical support and maintenance for AWS infrastructure (EC2, RDS, S3), consistently achieving 99.9% operational uptime through proactive monitoring and rapid issue resolution across 50+ production servers.
- Automated log monitoring and alerting using CloudWatch Logs, CloudWatch Alarms, and SNS, reducing mean time to detection (MTTD) for critical incidents by 60%.
- Configured ELB to distribute traffic across EC2 instances, implemented Auto Scaling Groups, and managed Route 53 DNS for 10+ domains, improving system reliability and reducing costs by 25% during low-demand periods.
- Strengthened application security by managing IAM roles, security groups, and network ACLs; conducted regular audits and vulnerability remediation, reducing unauthorized access incidents by 40%.
- Managed 500+ JIRA tickets and maintained Confluence documentation for infrastructure runbooks, improving team response efficiency and knowledge sharing by 20%.

EDUCATION

2019 – 2022

Shivaji College, University of Delhi

Bachelor of Business Economics (BBE) | CGPA: 6.84

LICENSES & CERTIFICATIONS

Certificate in Data Analytics | Issued Jan 2023

Diploma in Computer Applications (DCA) | Issued Jan 2017

PERSONAL PROJECTS & PORTFOLIO

[muein.cloud](#) – Personal cloud portfolio site hosted on AWS EC2 (MERN stack) with Nginx reverse proxy, Certbot SSL, PM2 process management, and GitHub Actions CI/CD auto-deployment pipeline.
